

Natural-build efficiency $E = P(\text{solved} \mid \text{spontaneously built})$, over (T, N)
(region-sweep back-analysis; gaussian-pooled bw=1; x = never built in that cell; green = built and finished)

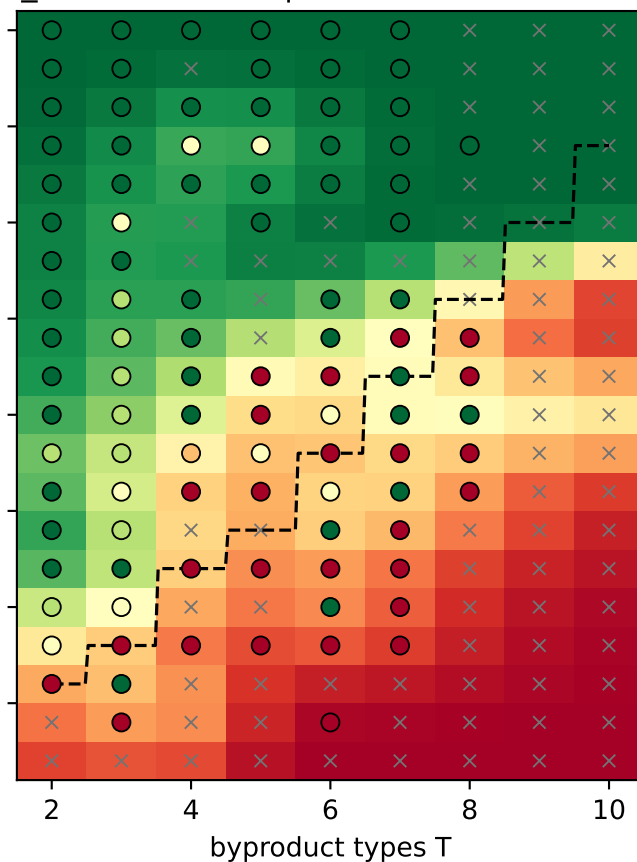

Haiku

$E_{\text{nat}} = P(\text{solved} \mid \text{built}) = 0.45$ (n=287)

Sonnet

$E_{\text{nat}} = P(\text{solved} \mid \text{built}) = 0.73$ (n=180)

Opus

$E_{\text{nat}} = P(\text{solved} \mid \text{built}) = 0.73$ (n=44)
